TECHNICAL BULLETIN

N° ITM044

From : Joël HUET
Date : 13th March 2013

Number of Pages : 1
(included this one)

Application : All AlphasdocM3

- **From : All AlphasdocM3**
- **Retrofit : Possible with restriction**

SUBJECT : Replacement of obsolete screen MAC-E100 by a kit P/N° 9032
(end of life)

As part as of our ongoing effort to improve product quality and due to the end of the life of the screen, we have replaced the screen and the linking cable to the plc.

- Parts to be removed:

- 1 Screen MAC-E100 p/n° JE29024
- 1 Linking cable to Plc p/n° JE29023

- Replacing new parts:

- 1 Screen GT1030-HBD p/n° JE29075
- 1 Linking cable to Plc p/n° JE29076
- 3 meters of cable: C+, D-, PE for power of the screen p/n° JE03001
- 2 parts to fix the new screen p/n° L3087TEMP

- Parts to be modified:

- Top cover L3087, see drawing L3087-1-TEMP

- Plc to be re-programmed: The existing plc must be sent to us to be re-programmed, so as to make it to communicate with the JE29075.

All these parts are included in the KIT 90323

NOTA: replace also the electrical diagram "Cablage pupitre" JE29075 Folio 01

Important: This retrofit is possible but you have to replace the linking cable + to modify the top cover + to add 2 parts + re-programm the Plc (to be sent). The functions however remain the same, no change.
